

▶ Platform Supply Vessel (PSV)

▶ Specialised Vessels

▶ Submersible

▶ Semisubmersible Support and Maintenance Unit

▶ Semisubmersible Drilling Tender (SSDT)

▶ Drillship

▶ Floating Production Storage and Offloading Vessel (FPSO)

▶ Floating Storage and Re-gasification Unit (FSRU)

▶ Floating Liquefied Natural Gas Vessel (FLNG)

▶ Icebreaker

▶ Anchor Handling Tug Supply Vessel (AHTS)

▶ Semisubmersible Accommodation Unit (SSAU)

▶ Multi-Purpose Self Elevating Platform (MPSEP)

▶ Jackup Rig

▶ Semisubmersible Drilling Rig

▶ Extended Tension Leg Platform (ETLP)

▶ SPAR

▶ Semisubmersible Floating Production Unit (FPU)

▶ Ice-class Floating Storage and Offloading Vessel (FSO)

▶ Ice-worthy Mobile Offshore Drilling Unit

▶ Platform Supply Vessel (All waters)

- Specially designed to supply offshore oil platforms
- 4500 DWT PSV

▶ Specialised Vessels (All waters)

- Pipe Laying Vessel
- Diving Support Vessel

▶ Submersible (Shallow water <30 ft)

- Mobile unit which sits entirely on the seabed during operation

▶ Semisubmersible Support and Maintenance Unit (Deep water)

- A floating platform to support maintenance and upgrading works for FPSOs with high operational uptime
- SMART Semi

▶ Semisubmersible Drilling Tender (SSDT) (Deep water - 6,000 ft)

- A floater that operates alongside SPARs and Tension Leg Platforms
- SSDT™ 5000NG
- SSDT™ 3600E

▶ Drillship (Ultra-deep water - 12,000 ft)

- Able to undertake ultra-deepwater drilling
- CAN-DO Drillship

▶ Floating Production Storage and Offloading Facility (FPSO) (Deep water)

- Ship-shaped facility used for the processing of oil or gas, storage and offloading of oil or condensate

▶ Floating Storage and Re-gasification Unit (FSRU) (All waters)

- Able to receive LNG from a carrier, re-gasify to natural gas and send out through risers and pipelines

▶ Floating Liquefied Natural Gas Facilities (FLNG) (All waters)

- Able to treat and liquefy Natural Gas as well as store and transfer LNG at sea

▶ Icebreaker (All waters)

- A support vessel that forges passages through icy waters

▶ Anchor Handling Tug / Supply Vessel (AHTS) (All waters)

- Equipped for emergency stand-by/rescue, oil recovery and fire fighting

▶ Semisubmersible Accommodation Unit (SSAU) (All waters)

- Floating unit that provides accommodation for crew
- SSAU™ 3600
- DSS™ 20NS
- SSAU™ 5000NG

▶ Multi-Purpose Self Elevating Platform (MPSEP) (Shallow water - 213 ft)

- A wind turbine installation vessel which can also support oil and gas activities

▶ Jackup Rig (Shallow water - 500 ft)

- Self-elevating mobile drilling unit that stands on its legs on the seabed during operation
- KFELS MOD Vri
- KFELS A Class
- KFELS B Class
- KFELS Super A Class
- KFELS Super B Class
- KFELS C Class
- KFELS N Class
- KFELS N Plus
- KFELS J Class
- KFELS E Class

▶ Semisubmersible Drilling Rig (Deep water - 10,000 ft)

- A floating unit which can perform deepwater drilling operations
- DSS™ 20
- DSS™ 38
- DSS™ 38M
- DSS™ 51
- DSS™ 38E
- DSS™ 51HE
- DSS™ 60HE
- SSDU 5000

▶ Extended Tension Leg Platform (ETLP) (Deep water - 8,000 ft)

- A vertically moored floating structure used for the production of oil or gas

▶ SPAR (Deep water - 8,000 ft)

- A large cylindrical unit which supports a rig platform, and anchors it to the seafloor using cables and chains

▶ Semisubmersible Floating Production Unit (FPU) (Deep water)

- A floating platform used to produce oil and gas in deepsea
- DeepDraft Semisubmersible

▶ Ice-class Floating Storage and Offloading Vessel (FSO) (All waters)

- Ice-resistant vessel that receives crude oil from a fixed platform and offloads it to shuttle tankers

▶ Ice-worthy Mobile Offshore Drilling Unit (Shallow water - 160 ft)

- Able to operate in the harsh Arctic region
- Gemini
